DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-71, drawn to a handwriting tablet, classified in class 178, subclass 18.03.
 - II. Claims 72-79, drawn to pattern recognition, classified in class 382, subclass 199.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I does not require the particular a bounding box encompassing at least a portion of each stroke, storing the handwritten input and the bounding box and editing the handwritten input as recited in invention II.

See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2675

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
